-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority. It is noted, however, that applicant has not provided English translation of the Japanese application as required by 35 U.S.C. 119(b). Thus, the priority date of the instant application is only entitled to the international filing date of July 22, 2003 (the date of the PCT application). Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Information Disclosure Statement

The inclusion of a copy of an International Search Report in the IDS has not been considered because they are non-published documents and cannot be properly cited on a 1449 due to lack of a date of publication.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 4173

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by the work of Kimura et al.

Specifically, Kimura et al. teaches an indomethacin-containing composition containing capable of reducing skin irritation (see abstract, already cited in IDS, form 1449 as JP 10-182458, Taisho Pharmaceutical Co. LTD). Additionally, Kimura discloses the use of 3.0% sorbitan monostearate in the indomethacin-containing composition (see working example 2 vs. instant claim 3). Particularly, in working example 3 of Kimura, a gel preparation is disclosed wherein the composition is comprised of 0.5% Indomethacin, 30.0% denatured ethanol, 1.5% carboxyvinyl polymers (gelling agent), 3.0% adipic-acid (an oil component), water and 5.0% polyethylene glycol monostearate with a melting point of 60-63 °C (as evidenced by the melting point index in the Sigma Aldrich catalog). Accordingly, the teachings of Kimura et al. anticipate claims 1-3.

While the exact percentage of all of the ingredients are not disclosed by Kimura, it is generally noted that differences in percentages do not support the patentability of subject matter encompassed by the prior art unless there is evidence indicating such concentration or temperature is critical. "[W]here the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation." *In re Aller*, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA

Art Unit: 4173

1955). Given that applicant did not point out the criticality of specific ranges or percentages of the invention, it is concluded that the normal desire of scientists or artisans to improve upon what is already generally known would provide the motivation to determine where in a disclosed set of percentage ranges is the optimum combination of percentages.

Conclusion

All claims are rejected. No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Samira Jean-Louis whose telephone number is 571-270-3503. The examiner can normally be reached on 7:30-5 PM EST M-Th.
